## Summary

---

Front-end developer with over 4 years of experience. Passionate about solving complex challenges with innovative and efficient solutions, always focused on delivering high-performance and impactful projects.

## Skills

---

- Languages: JavaScript, TypeScript, Java, Python
- Frameworks: React, Angular, Vue, Svelte, NextJS, Cypress
- Libraries: react-query, react-redux, react-router-dom
- CSS Libraries: Tailwind, styled-components
- Testing Libraries: jest, vitest, react-testing-library
- Tools: GIT, OCP, Azure
- SCRUM, KANBAN

## Work experience

---

### Mid-Level Software Analyst - CI&T(December 2021 - Present)

Front-end development using React JS/TS, Vite, and Next JS. Support for the intern team.

#### Key Points:

- Develop responsive and dynamic web interfaces using React, Next.js, TypeScript, Redux, and Axios.
- Create and maintain unit tests with Jest and Vitest, ensuring code quality and functional stability.
- Contribute to project planning and stage definition, supporting task prioritization and progress monitoring.

#### Key Achievements:

- Migrated a project from Node.js 12 and Create React App (CRA) to Node.js 18 and Vite.
- Designed, developed, and deployed a project using Next.js and Tailwind CSS.

### Intern - Dextra (January 2021 - December 2021)

Worked as a front-end developer using React JS on one of Alelo's projects.

## Education
